## BioClinical Data Bank

### LOGGIC: Low Grade Glioma In Children

## Letter of Confirmation: Status as 1<sup>st</sup> Level Molecular Diagnostics Facility (“HUB”) for LOGGIC Core

We hereby confirm that the following Institution

**Name of Institution:** The Children’s Memorial Health Institute

**Address:** The Children’s Memorial Health Institute  
Department of Pathology  
The Children’s Onkogenetics Lab  
Al. Dzieci Polskich 20  
04-730 Warszawa  
Poland

**Contact Person:** Joanna Trubicka

**E-Mail:** j.trubicka@ipczd.pl

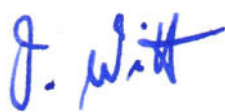

**Phone Number:** +48228151960

**Country:** Poland

**National Coordinator:** Marta Perek-Polnik

fulfills the General Criteria as confirmed by questionnaire, and has successfully participated in the 1<sup>st</sup> Level Molecular Diagnostics Facility (“HUB”) inter-laboratory comparison that includes generation of high quality DNA methylation profiling data and BRAF V600 sequencing as well as data interpretation and copy number profile analysis. Results of analyses were provided within the required 30 calendar days and were correct.

The above named Institution is therefore granted the status to act as LOGGIC 1<sup>st</sup> Level **Molecular Diagnostics Facility (HUB)** within LOGGIC Core BioClinical Data Bank. In the future, further measures to ensure ongoing quality may be necessary.
